PROFILE

Motivated Computer Networking & IT Security individual with a strong foundation in network monitoring, troubleshooting, and infrastructure support, built through hands-on experience with Windows Server, Linux, and Cisco Packet Tracer, along with cybersecurity principles and AWS cloud architecture. Aiming to grow into a skilled IT & NOC professional by contributing to reliable network operations, proactive issue resolution, and secure infrastructure management, while continuously building expertise toward a long-term career in network operations and IT security.

EDUCATION

BSc (Hons) Computer Networking & IT Security Nov 2024 – Present

Islington College

London Metropolitan University

Kamal Marg, Kamalpokhari, Kathmandu

School Leaving Certificate (SLC) Jul 2020 – Jul 2022

Capital College and Research Center (CCRC)

Nepal Examinations Board

Surya Kot Marg, Kathmandu

Secondary Education Examination (SEE) Mar 2013 – Mar 2020

V.S. Niketan Secondary School

Nepal Examinations Board

Sudidhanagar Marg, Kathmandu

EXPERIENCE

Cyber Security Intern May 2025 – November 2025

Skill Museum and Research Center (SMaRC)

- Researched new and emerging trends in cybersecurity.
- Taught SEP students on core topics related to cybersecurity.
- Educated the public on cyber-attacks and prevention during outreach events.

IT Support June 2026 – Present

Scodus Innovation Pvt Ltd.

- Troubleshooting the POS system and printers.
- Training users to use the software.
- Managing the users accounts according to their roles.
- Making CAT6 cables and managing the wires.

SKILLS

- **Programming Languages:** Python, Java, HTML, CSS, JavaScript
- **Applications & Software:** Windows Server 2022, Cisco Packet Tracer
- **Operating Systems:** Windows, Linux
- **Soft Skills:** Communication, Time Management, Leadership, Adaptability
- **Hardware:** Printer Troubleshooting, CAT6 Cable

PROJECTS

Aura Watch (HTML, CSS, JAVASCRIPT)

Collaborated with a team to design and develop a static e-commerce website for an online watch store. Independently designed and implemented the blog section of the website, structuring blog post layouts with HTML, styling them for a clean and consistent look using CSS, and adding interactive elements with JavaScript to improve readability and user engagement. Contributed to the overall front-end development of the site as part of a collaborative team effort.

Gym Management System

(Java)

The Gym Management System is a GUI-based desktop application built in Java to streamline day-to-day gym operations. It allows administrators to add, update, and remove member records, while distinguishing between premium and normal membership tiers to apply appropriate benefits and pricing. The system tracks member payments and stores all data in structured text-file tables, ensuring that details such as membership type, payment history, and personal information are organized and easily retrievable. The project demonstrates practical use of Java for building interactive desktop interfaces alongside file-based data persistence, offering a lightweight yet functional solution for small-scale gym management.

Inventory Management System

(Python)

The Inventory Management System is a Python-based application designed to help wholesalers manage and track their stock efficiently. It maintains a real-time record of products and quantities, automatically updating inventory levels whenever a purchase is made. The system supports discount applications on eligible items and generates a bill with the calculated total amount for each transaction. By linking inventory tracking directly to the billing process, the project ensures accurate stock management and reduces the chances of manual error, making it a practical tool for small to medium-sized businesses handling day-to-day sales and stock control.

TRAINING / CERTIFICATIONS

- Global Professional Pathway Course (GPPC) | Islington College — 2024
- [AWS Academy Graduate – Cloud Foundations](#) | Amazon Web Services — 2026
- [AWS Academy Graduate – Cloud Architecting](#) | Amazon Web Services — 2026

ACHIEVEMENTS

- Summer Industry Enrichment Reflection and Arcade (S.I.E.R.A) | Information Security Audit (2025)

LANGUAGES

Spoken: English, Nepali, Hindi
